Julie Tassia Rafidy

Computer Science Graduate Student | Software QA Tester
Antananarivo, Analamanga, Madagascar

Experience

Konecta

Software QA Tester
April 2024 - Present (10 months)

My principal role is to ensure the product is good to go before the deployment of a new functionality or a bug fix, by performing regression testing; and before that, performing unit tests to make sure releases meet the client requirements. I am in charge of writing clear documentations (for my coworkers, as well as the end user) as well.

Huawei

Campus Ambassador
May 2023 - February 2024 (10 months)
Antananarivo, Analamanga, Madagascar

I worked as a full-time Campus Ambassador of the Huawei ICT Academy at University of Antananarivo. I was mainly in charge of relaying information related to the activities of Huawei to the students and teachers of MISA, and helped students in their experiences with Huawei's ICT Talent platform; as well as reporting feedback on their activities on the platform to Huawei's representatives. I have also contributed to the organization of Huawei's activities on the campus to promote digital awareness to the students and increase their interests in Huawei's services and technologies.
